Senior Full-Stack Software Engineer, AI Engineer and Systems Architect with over 11 years of experience designing and building complex web applications end to end. Specialized in the full software development lifecycle, combining seamless frontend interfaces with scalable backend architectures, enterprise API integrations, and real-time data processing. Early adopter of AI development tools (Claude Code, Codex, Windsurf, Antigravity, GenSpark) to accelerate delivery and improve code quality across PHP, Java, and Python services. Proven track record translating business requirements into robust, secure, and maintainable full-stack solutions. Remote-ready, bilingual professional.

CORE COMPETENCIES

Full-Stack & Dashboard Development: End-to-end design of custom B2B web applications, corporate dashboards, and client portals using PHP and JavaScript.
Backend Engineering & API Architecture: RESTful APIs, microservices, enterprise SDK integrations (QuickBooks, CRMs, Meta Graph API, Google Cloud) using Node.js, PHP, Python, and Java.
AI-Powered Development: Built and published AI apps: Laura AI Assistant (Google Play Store), Mail GPT (Outlook App Store), Facebook/Instagram chatbot, Drive Thru App, Real-time Translator for Zoom/Meet/Teams, AI Video Transcriber, AI SMS/Whatsapp Chat, AI Pre-Sales Engineer, AI Email Monitor, AI Real Time Advisor (Chrome extension), Autonomous AI SDR & Meeting Scheduler.
Databases & Real-Time Data: PostgreSQL, MySQL, MariaDB, SQLite. Event-driven architectures with WebSockets, MQTT, and TCP sockets.
Systems Automation & Integration: Custom data pipelines via PHP, Python, Node.js, and orchestration tools (n8n, Make). Workflow automation eliminating operational bottlenecks.
Mobile & Web-to-Native: Published Android applications using PWA and TWA architectures, bridging web ecosystems with mobile deployment standards.
Languages: English (Professional Working Proficiency), Spanish (Native).

PROFESSIONAL EXPERIENCE

Megatech Distributor - *March 2021 - August 2026*
Senior Software Engineer & Technical Lead

- Built and published AI applications: Laura AI Assistant (Google Play Store), Mail GPT (Outlook App Store), Facebook/Instagram chatbot, Drive Thru App, AI Video Transcriber, AI SMS/Whatsapp Chat, AI Pre-Sales Engineer, AI Email Monitor, AI Real Time Advisor (Chrome extension), Autonomous AI SDR & Meeting Scheduler.
- Designed and developed the core corporate dashboard and multiple full-stack B2B web applications using PHP and JavaScript. Centralized KPIs, logistics tracking, and client portals, significantly improving operational visibility and streamlining cross-departmental workflows.
- Served as the primary technical advisor in strategic B2B client meetings, diagnosing operational bottlenecks and architecting tailored software solutions in real time to accelerate decision-making and technical project sign-off.
- Architected and deployed autonomous commercial AI agents using Openclaw and Paperclip frameworks, enabling the execution of complex sales workflows, dynamic reasoning, and direct customer interactions.
- Redesigned and optimized key backend modules using Node.js, PHP, and PostgreSQL, reducing average API response latency by 35% and accelerating overall application load times.
- Architected and implemented data synchronization pipelines between the internal CRM and QuickBooks Online API using PHP scripts and webhooks, eliminating over 15 hours per week of manual reconciliation.
- Built and successfully published 3 Android applications leveraging PWA and TWA architectures. Managed the technical bridge between web-based backend logic and native mobile webviews, ensuring seamless data handoffs and optimizing mobile user experience.
- Developed AI-powered workflows leveraging LLMs (OpenAI, Claude API, Retell AI) to automate email triage, customer support, and SMS/voice conversational agents via Twilio, significantly reducing manual support loads.
- Managed and secured Linux server environments (VPS) with Nginx and Apache2, maintaining 99.9% system uptime and optimizing server resource consumption by 20%.
- Designed complex database schemas and optimized SQL queries in PostgreSQL and MySQL, handling high-volume transactions and reducing execution times for heavy data reports by 40%.

Tech Stack: PHP, JavaScript, Node.js, Python, Java, PostgreSQL, MySQL, REST APIs, WebSockets, Webhooks, Docker, Nginx, Apache2, OpenAI API, Claude API, Retell AI, Twilio, n8n, Make, QuickBooks API, Meta Graph API, Microsoft Graph API, Git, RAG, MCP, OpenClaw, Paperclip.

Gatria S.A.S. - *February 2015 - March 2021*
Senior Systems Engineer & Solutions Architect

- Led technical discovery and implementation of mission-critical IoT data concentration systems, designing architectures that processed real-time telemetry from thousands of endpoints via MQTT, WebSockets, and TCP.
- Built and deployed robust RESTful API ecosystems using PHP and Node.js, supporting seamless integration with third-party platforms and processing over 50,000+ daily requests with near-zero error margin.
- Implemented bidirectional real-time communication pipelines using WebSockets and MQTT protocol, achieving data transmission latency under 100ms for event monitoring.
- Optimized relational databases (MariaDB and MySQL), restructuring indexes and eliminating concurrency bottlenecks, increasing data read speeds by 50%.
- Orchestrated integration of custom SDKs and connectors for enterprise platforms, reducing friction in operational data entry and decreasing manual errors by 80%.
- Designed and developed web applications and backend network servers for LoRaWAN projects, smart-card prepaid systems with AES encryption, and real-time dashboards for IoT device monitoring.
- Created API web services as the primary integration bridge between distinct enterprise applications, drastically reducing data silos and manual entry errors.

Tech Stack: PHP, JavaScript, Node.js, Python, Java, PostgreSQL, MySQL, MariaDB, SQLite, MQTT, WebSockets, TCP, SOAP, Smart Cards (MIFARE DESFire), AES/DES/3DES, OpenLayers, Google Charts, Nginx, Apache2, Linux (Ubuntu, Debian, Red Hat), Git.

SKILLS

Programming Languages: PHP, JavaScript, Python, Java, SQL.
Frontend & UI: HTML5, CSS3, Tailwind CSS, JavaScript, Responsive SPA Design, Bootstrap, jQuery.
Backend & Frameworks: Node.js, Express.js, RESTful APIs, SOAP, WebSockets, MQTT, GraphQL, Laravel, Vue.js.
Databases: PostgreSQL, MySQL, MariaDB, SQLite.
AI & Integration Tools: OpenAI API, Claude API, Retell AI, Google Cloud APIs, Meta Graph API, n8n, Make, Microsoft Graph API, Shopify API, Bitrix24 API, QuickBooks API, Twilio, Ollama, Tool Calling, MCP, RAG, LangChain, LanGraph.
Infrastructure: Linux (Ubuntu, Debian, Red Hat, CentOS), Nginx, Apache2, Docker, AWS, VPS Management.
IoT & Protocols: LoRaWAN, MQTT, TCP/UDP, Smart Cards (MIFARE DESFire), AES/DES/3DES Encryption.
Tools & Methodologies: AWS, Azure**,** Git, Scrum/Agile, CI/CD, Docker.
CRMs: GoHighLevel, Bitrix24

EDUCATION & CREDENTIALS

Universidad Surcolombiana - *Neiva, Colombia. B.S. in Electronic Engineering (Government Scholarship Recipient), September 2014.*
SENA - *Neiva, Colombia. Networks and Security, 2014.*
SENA - *Neiva, Colombia. Design and Construction of Distribution Boards, AutoCAD 2D, 2013.*
Institución Educativa Técnico Superior - *Neiva, Colombia. Technical Bachelor, December 2008.*
